

FUNC SHORT THROW WALL MOTORIZED

SKU: N/A

An ergonomic and flexible stand that is easy to install. This solution, with its stable design, is perfect for large interactive boards. The motorized height adjustment (applicable to most markets) is soft and quiet, readily available from a button under the interactive board. Func Short Throw Wall Motorized has a simplified mounting procedure compared to its predecessors, and is all in all a very stable and functional alternative for both schools and conference facilities.

Choose SMS universal slide to match the projector, alternatively an adapter for projectors with a projector pillar already included. The stand can be adjusted both vertically and horizontally upon installation.

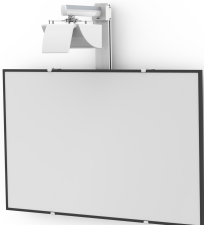

The possibility to fine tune the height of the projector pillar gives you the best possible image. The attachments for the interactive board are universal which means the product can be used with most currently available interactive boards on the market.

If you want to use the projector pillar included from the projector manufacturer; [contact us](#) for available adapters.
