

## FUNC VERITABLE

SKU: N/A

One moment a presentation display, the next an interactive desk. Func Veritable is a floorstand that makes presentations more interactive by providing flexibility for touch displays. The smooth and silent motor-driven tilt function allows you to switch the display easily from a vertical to a horizontal position. The tilt function, the adjustable height and sturdy wheels combine to make this the ideal solution for universities, architects and companies who need to discuss, sketch or draw up guidelines. Our new updated Veritable has several great improvements: the VESA hole pattern now covers all the way from 200x200 to 600x600 mm - no adapter necessary! The motorized up- and down movement has a clever and sensitive anti-collision function, and the whole unit is lighter than before, thanks to the aluminium back cover. Please check that your display model can be placed in a face up/table position.

New! Choose white or black finish.
